

Remote Attendance

Remote attendance allows participation in face-to-face training with the benefits of immediate verbal and visual interaction but without having to travel to the classroom.

Benefits of Remote Attendance

If you are unable to travel or are not located near a training location, remote attendance may be an option for you. SST will ship course materials including a PC and audio/video equipment to your home or office.

Remote access students attend the same live training delivery as students in the classroom.

Two-way video and audio communication allows participation as close to "being there" as possible.

Remote attendees benefit from the interactions between other students and the instructor, such as real-time questions and answers, and have the opportunity to actively participate as well.

The hands on lab equipment shipped to remote attendees is the same as that provided in the classroom.

Via remote viewing and control software, the instructor can monitor your lab work and respond to any issues during the exercises, in much the same way that the instructor monitors lab work in the physical classroom.

Why Choose SST?

Software Skills Training, Inc. (SST) delivers publicly held open-enrollment [courses](#) throughout the United States, as well as private, [on-site team training](#) held at the customer's facility. Our classes are taught by experts from the information technology industry who are experienced with quickly building your knowledge-base through in-depth facilitation coupled with intensive labs.

Our students spend at least 50% of their time in class performing structured hands on lab exercises that build competence, confidence, and clarity.

Student Testimonials

This was a great course - I was a bit nervous about the remote training option but you guys pulled it off with flying colors. Sending the equipment with all of the software pre-loaded and configured was a fantastic idea.

– T.E., US Nuclear Regulatory Commission

This was my first virtual class. I was very skeptical in taking it, as I did not think it would work well. But, you guys did an amazing job at ensuring I could see the instructor well and remote to the equipment without any issues. It was fantastic!

– D.M., UPS

Taking the Android Programming class remotely worked out really well. The equipment provided and the thorough checkout of it was really smooth. I did not feel that I missed anything at all due to taking the class remotely.

– J.Y., General Dynamics

I did appreciate the remote aspect of the class. I enjoyed pairing up with another student to do lab-work, and I liked how we could exit from the training and rejoin once we were done (pretty impressive!). It was helpful that the instructor could log into our session as well, and could provide guidance during lab exercises. I also appreciated that we can control the camera zoom if needed. My partner and I did not feel left out at all by attending remotely, and I don't feel we were any worse for not being physically there in the classroom.

– K.B., Lonza Biologics Inc.

“ Although I attended the class remotely, I felt like I was in the classroom with the instructor. The instructor did an outstanding job providing examples from his own work experiences and relating functionality to VB basic with which I had familiarity. It was a very rewarding experience.

– B.C., One Financial Centre

“ Surprised by how good the remote attendance experience was. Felt like I got the full benefit of the course without the difficulty of travel.

- T.O., Millennium Engineering & Integration Co.

“ Very knowledgeable and personable instructor. Also, the software and equipment used to teach this course (remotely) worked flawlessly. I'd highly recommend taking more IT courses (remotely or on site) with this instructor and your company again.

– J.G., Boston Financial Data Services

“ I took the class remotely and I couldn't be more pleased with the overall experience. I've taken several similar classes and workshops and this has been the best experience that I've had.

– D.R., NCFB Mutual Insurance Company
